Tools: Git, GitHub, Postman, Swagger UI, Visual Studio, VS Code

CERTIFICATIONS

Responsive Web Design (**freeCodeCamp**)

JavaScript Algorithms & Data Structures (**freeCodeCamp**)

Cloud-Based Web Development (**Stamford International University**)

LANGUAGES

English (Fluent)

Burmese (Native)

PHONE MYAT PAING

FULL-STACK DEVELOPER

React.js | TypeScript | ASP.NET Core | C# | SQL Server

PROFILE

Full-stack developer with a 5-month internship at Bangkok Glass Public Company Limited, building React.js and TypeScript interfaces for a customer-facing football club website, including the front end of an AI chat assistant, and integrating them with ASP.NET Core REST APIs. Built CondoQueue, MovieTracker, a full-stack app with an ASP.NET Core Web API, SQL Server, and React. Skilled in responsive UI, API testing with Postman and Swagger, and Git/GitHub. Seeking a Junior Full-Stack, .NET, or React Developer role.

PROFESSIONAL EXPERIENCE

Software Developer Intern **Nov 2025 – Mar 2026**

Bangkok Glass Public Company Limited, Bangkok, Thailand

Project: BG Pathum United FC website redesign (customer-facing)

- Developed 10+ reusable React.js and TypeScript components with Tailwind CSS, used across 7 pages of the redesigned customer-facing website.
- Implemented client-side routing with React Router and responsive layouts using Vite.
- Built the front-end interface for an AI chat assistant that connects to an AI chatbot service through its API.
- Integrated the front end with ASP.NET Core REST APIs, handling JSON requests and responses.
- Assessed REST endpoints using Postman and Swagger UI and reported integration and data issues to backend developers.
- Used Git/GitHub for version control and validated features before deployment.

PROJECTS

CondoQueue

Bangkok Condo Repair & Bill Platform (Oct 2026) | React, TypeScript, .NET 8, Tailwind

- Built end-to-end ticketing for Bangkok condos: resident reports → niti assigns → technician closes, with TH/EN toggle
- Implemented PromptPay QR mock billing, role-based dashboard, and mobile-first dark mode UI
- Designed REST API structure following .NET Controller pattern, deployed on Netlify
- Live: condoqueue.netlify.app | Code: github.com/PhPaing/CondoQueue

MovieTracker

ASP.NET Core Web API, SQL Server, React.js, JWT

- Built a full-stack movie watchlist: ASP.NET Core Web API with JWT authentication and EF Core migrations on SQL Server, with a React.js front end.
- Created a background service that imports movies from the TMDB API every 24 hours and updates existing records without duplicates.
- Implemented search, genre filter, sorting, server-side pagination, personal lists with ratings and notes, and a top-genres stats chart.
- Code: github.com/PhPaing/Movie-Tracker

BG Pathum United Football Club Website

React.js, TypeScript, Tailwind CSS, JavaScript, REST APIs

- Built a responsive football club website featuring match schedules, news, player information, standings, and video content.
- Developed reusable React.js components and responsive UI features using TypeScript and Tailwind CSS.
- Integrated the YouTube API and Football Data API to display dynamic video content and football match information.
- Live: bg-pathum-united-website.vercel.app | Code: github.com/PhPaing/bg-pathum-united-website
